

Hair Mineral Analysis Order Form

HAIR SAMPLE LOCATIONS – Best taken from the neck region. The best place is at the back of the neck between the top of the head and the shoulders.

Try to avoid using medicated shampoo or other treatments on hair prior to taking sample.

AMOUNT OF HAIR NEEDED -You will need approximately 4cm or 1.5 inches of hair (**at least 1 heaped tablespoon**) or not less than 1g, cut as close as possible to the skin, using clean scissors or a razor.

Place the sample straight into the bag provided and do not wash sample after cutting.

The cost of the test is \$140.00 and this includes our detailed report on your animal's nutrient and toxin levels. Your report will also include suggestions on how to overcome any nutritional disorders and unwanted toxins levels.

We test for 16 nutrient elements, 9 non-essential and 15 toxic elements.

Please send hair sample with payment in envelope provided.
