HEALTHY & HAPPY PETS  
NATURALLY

Greenpet is committed to supplying and producing the finest quality natural health products for animals.

We are also dedicated to educating animal guardians to provide optimum nutrition to prevent disease and maintain a long healthy life for all species.

Most of the health conditions that domestic animals suffer from today are related to poor diet and toxicity from the over-use of drugs and chemical products.

By raising animals on natural raw food from an early age you will not only prevent many health conditions, you will see the difference in their overall health.

- Shiny, healthy coat
- No bad breath
- Longer lifespan
- Reduce vet bills
- No smelly skin
- Strong, healthy teeth & gums

## SIMPLE BOOTS FOR HORSES

If you are like me and prefer to keep your horses barefoot as nature intended but still enjoy riding over all sorts of terrain then boots are a perfect solution. Your horse is kept barefoot when in the paddock and you only put boots on when riding on rough ground.

Cavallo Simple boots are a great all purpose boot for horses. They come in pairs and are available in various sizes.

Features include-  
-Built-in drainage  
-Simple to put on and remove (even with arthritic hands!); stays securely on hoof.

-Shaped for the natural hoof (needs no inserts or shims)

-Simple front fastening

with industrial grade Velcro® closures.

-Absorbs shock - so your horse's legs don't need to!

-Genuine leather upper is comfortable and flexible.

-Mould-in back flap for bulb protection and abrasion resistance.

-Durable construction: Waterproof thread, rustproof metal and high performance TPU outsole.

-Promotes healthy hooves: allows expansion and contraction, and increased blood circulation.

-Soft leather foam-filled collar (Cavallo Pastern Wraps are available for added protection if desired) but are usually not needed.

-Built-in sole relief: Raised inner rim takes pressure off sole, bar and frogs. To work out which size simply measure the hoof length

carefully just AFTER A FRESH TRIM. Do NOT include heel bulbs. They have allowed for growth between regular trims. MEASURE FROM TOE TO BUTRESS OF HEEL as shown below.

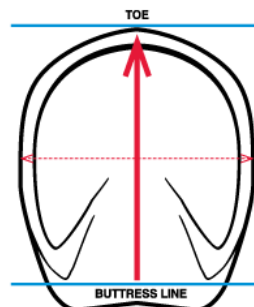

Contact Greenpet if you would like to order a pair of Simple boots for your horse. At only \$199 per pair, they are a much more economical alternative to shoes. Can be used on front & back but most horses can cope well with only front boots.

### SIMPLE to Measure

Simply measure each hoof length from buttress to toe just after a fresh trim, as shown in the diagram.

Length INCHES	SIMPLE SIZE	Length MILLIMETERS
4" - 4 1/4"	0	102 - 109
4 5/16" - 4 9/16"	1	110 - 117
4 5/8" - 4 7/8"	2	118 - 125
4 15/16" - 5 1/16"	3	126 - 133
5 1/4" - 5 1/2"	4	134 - 141
5 9/16" - 5 13/16"	5	142 - 149
5 7/8" - 6 1/8"	6	150 - 157

SIMPLE Boot allows for growth between regular trims. If your horse's hoof width exceeds the length by more than one size, then SIMPLE Boot may not be suitable for your horse.

MARCH - MAY 2010

## DANGERS OF IRRADIATED FOOD

At least three instances of irradiated food causing severe nervous system disease have occurred around the world since 1998. The cases happened in Ireland and the US in laboratory cats and in Australia among pet cats.

The Australian government ordered an immediate stop to sterilizing cat food via irradiation in May 2009 after reviewing scientific studies pointing to food irradiation as the culprit behind illnesses character-

ized by ataxia or paralysis of the limbs, especially the hind limbs. Symptoms in the Australian cats first appeared three to six months after they were exposed to the dry food. Some had eaten the food for as few as three weeks; others for more than six months. The problem affected 90 cats in Australia, of which 30 died, mostly by euthanasia after they became paraplegic or tetraplegic, according to Dr. Georgina Child, a neurolo-

gist at the Small Animal Specialist Hospital and University of Sydney Teaching Hospital.

Irradiated pet foods are labelled as such in USA; Australia does not require labels on irradiated pet food.

It is therefore important to check that you are not feeding it to your animals. \*Greenpet does not stock any foods that are irradiated.

### ZIWIPEAK AIR-DRIED FOOD

“HELPS TO PROMOTE VITALITY, GOOD DIGESTION, HEALTHY COAT AND SKIN, REDUCED BAD BREATH AND FLATULENCE, HEALTHY JOINTS, GOOD WEIGHT CONTROL AND GENERAL WELLBEING”

ZiwiPeak is a 100% natural air-dried pet food that helps to promote vitality, good digestion, healthy coat and skin, reduced bad breath and flatulence, healthy joints, good weight control and general wellbeing.

Despite parting evolutionary company with wolves over 10,000 years ago, dogs still thrive on the sort of natural, predominantly meat diet they would ingest if they were hunting in the wild. A diet that stimulates optimum energy and good health.

As dogs hunting in the wild would eat virtually the whole animal, and derive the nutritional benefits of consuming items like the

liver, heart, kidneys and stomach lining (tripe), these should also form a small part of a naturally healthy diet.

For dogs to derive the most benefit from their food, it is important to retain as much as possible of the original nutrition value during the processing of the pet-food. ZiwiPeak food is air-dried to reduce the moisture (and thereby naturally preserving it), which also retains the nutritional value of the protein and vitamins for your animals. It contains only natural ingredients such as fresh Meat, Liver, Tripe, Heart and Kidney, Chicory Syrup, Green-lipped and

Blue Mussel, Fish Oil, Lecithin, Kelp, Vitamins and Minerals & Parsley. Now available from Greenpet in 1kg & 5kg packs for dogs and 400g packs for cats.

Flavours include ~ Lamb, Venison + fish and Venison.

Great all-natural air-dried food for optimum health. Just sprinkle the flakes into bowl to serve. RAW food that tastes great. Even the fussiest animals are eating this, so give it a try for really healthy fast food. It's our dog and cat's favourite !!

### K9 NATURAL FREEZE-DRIED FOOD

“BASED ON THE ACTUAL DIET OF THE DOMESTIC DOG'S CLOSEST RELATIVE, THE GREY WOLF”

100% natural and raw, K9 Natural contains only quality ingredients and absolutely no additives, artificial preservatives, wheat, wheat gluten, rice, rice gluten, cereal bulking agents or corn.

Based on the actual diet of the domestic dog's closest relative, the Grey Wolf, K9 Natural is made with 85% real meat & bone plus 15% fresh fruit and vegetables, whole eggs, garlic and cod liver oil so you can be sure your dog is getting everything nature knows it

needs.

K9 Natural doesn't contain any artificial colourings, flavourings or preservatives. There are also absolutely no cooked ingredients because cooking significantly reduces the nutritional value of food.

The food is freeze-dried to retain maximum nutrients and is ideal as a convenient way to feed a raw food diet to your dog. Great to have on hand if you forget to defrost meat or when travelling with your dog.

Simply pour warm water over required amount of food and serve immediately.

Available in lamb in 500g packs. (500g makes 2kg of ready to serve raw food when reconstituted with warm water).

### SECRET ANIMAL BUSINESS

Animal Communicator and shaman Billie Dean takes you on a journey into the secret world of animals. The animals have a message to share with humanity, to help us become better people, and live in harmony with

the planet. This book not only helps you to understand the animals in your life, it helps you understand yourself and the wider world in which we live. Wonderful stories of love, courage and hope.

Over 300 pages. Great value at only \$39.95

“A CELEBRATION OF THE SECRETS OF ANIMALS, THEIR FORGOTTEN LANGUAGE AND HOW THEY CAN HELP YOU AND THE PLANET HEAL”

### FEEDBACK FROM CUSTOMERS...

#### PETZLIFE ORAL GEL

“This product really does work. I have an eight year cocker spaniel whose teeth were covered in tartar and plaque. I was concerned about having her anaesthetised by the vet for a dental clean because of her age and the fact she has a slight heart murmur. I followed the product's instructions (using a small toothbrush) and within 3-4 weeks my dog's teeth were quite white with little tartar or

plaque residue. In fact, when I took her to the vet for a check up, she commented on what good condition my dog's teeth were in for her age - no dental cleaning required! Give it a try and I think you will be happy with the results and your dog will love the Wild Salmon Oil!” A.B

#### K9 NATURAL DOG FOOD

“This product appealed to me as something to have on hand when I'm too busy

to get my dog's regular raw food organised. It was quick” M.N

#### ZIWIPEAK DOG FOOD - Venison

“We have the fussiest dog ever, and it was always a struggle to get her to eat anything. She refused raw meat, and didn't like canned or many dried foods either. We wanted to ensure she was eating a healthy diet but found it very hard as she would go day's without eating and

lose so much weight and she is only tiny. We purchased the ZiwiPeak food and she loves it. She has now reached a good weight and is keeping it on. She never misses a meal now, and we can even mix it in with other fresh meats to get her eating more foods. Thanks for providing a great tasty alternative that is so healthy.” N.M

### NEW COMPATIBILITY TESTING FOR ALLERGIES

We are currently introducing a new service for dogs and cats that have allergies. Simply send in a fur/hair sample and we will have it tested for a range of foods, supplements, and other common external allergens.

It is not uncommon for dogs or cats to suffer from rashes, itchy skin,

digestive problems and other health issues due to reactions to particular foods, shampoos fleas, dust mites, plastics, etc.

If your dog or cat has a skin problem or other health issue that isn't clearing up with usual treatments then it may be worth considering testing them to ensure they are

not continuously exposed to foods and other things that are causing a reaction. Skin allergies are a common problem for many dogs and this is often a good way to find out what foods, etc; are best suited to enhance your animals overall health and wellbeing. You will receive a test results

page listing what foods and other items to avoid and those that are safe to use.

Compatibility (Allergen) Testing - \$127.00

Contact the clinic for more details on this service.
