HEALTHY & HAPPY PETS  
NATURALLY

Greenpet is committed to supplying and producing the finest quality natural health products for animals.

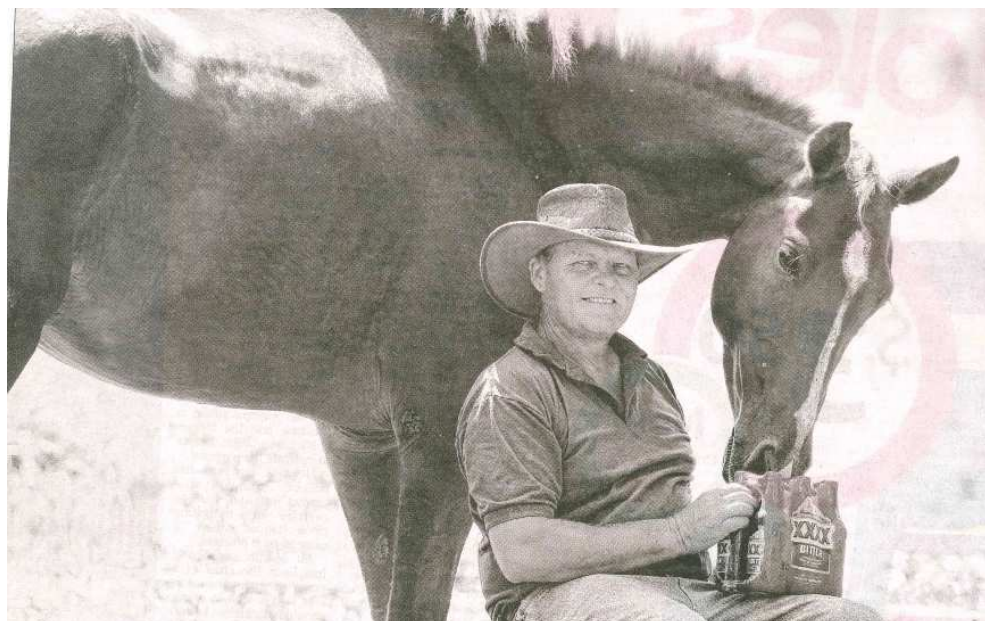

We are also dedicated to educating animal guardians to provide optimum nutrition to prevent disease and maintain a long healthy life for all species.

Most of the health conditions that domestic animals suffer from today are related to poor diet and toxicity from the over-use of drugs and chemical products.

By raising animals on natural raw food from an early age you will not only prevent many health conditions, you will see the difference in their overall health.

- Shiny, healthy coat
- No bad breath
- Longer lifespan
- Reduce vet bills
- No smelly skin
- Strong, healthy teeth & gums

## XXXX HELPS HORSE WITH COLIC!

Colic is often fatal to horses and opinion is divided on how it can best be treated. But Steve thinks he is on to a winner with the nectar of the gods.

"It bloody well worked" he said. "I am not sure of the science behind it, but because it's gassy it can give them some relief in their stomachs. He ended up taking quite a shine to XXXX, so I had to get him off the grog or he was going to cost me a fortune."

*Story from Gold Coast Bureau*

*Editors note: We do not recommend giving beer to your horse, but this was an interesting story and we thought it was worth sharing.*

*On the topic of colic ~ Greenpet CLC relief packs are good to have on hand for emergency's as colic inevitably strikes on weekends or after hours and the kit contains four of the common colic homeopathic remedies.*

It sounds like a lot of XXXX but beer saved this horse's life. Diamond Mojo, a six year old Australian Whaler had been given up for dead by his owner Steve Clibborn after being struck down with a bout of potentially deadly colic.

So, as desperate men do in desperate times, Steve turned to the bottle - not for himself, but for his horse. "I had pretty

much kissed him goodbye" he said. "I had spent 23 hours straight with him but nothing worked and then I remembered an old bush tale that said you could feed them beer. I don't know whether I really believed it or not but it was worth a shot and as soon as he had that beer, he burped and perked right up. So I gave him another couple."

Over the following days, Steve repeated the dose - using XXXX lager - until his prized endurance horse rediscovered his mojo.

Colic is a medical problem common in humans and horses resulting in acute abdominal pain, which can be caused by factors such as stress. Diamond Mojo had an unrelated leg injury that could have triggered the ailment.

## WINTER NEWSLETTER

ISSUE 48

JUNE ~ AUG 2011

### CHIA SEEDS FOR OPTIMUM HEALTH

Chia seeds contain an amazing amount of beneficial minerals, vitamins, proteins, and low NSC (non structural carbohydrate). They are a safe, easy way to boost your animal's energy, endurance, and overall health.

Chia seeds are an excellent source of calcium, phosphorus, magnesium, potassium, iron, zinc, Vitamin B, copper, EFA's and antioxidants.

Chia is high in Omega essential fatty acids. Chia seeds contain 32-39% oil. They have 3 times more Omega 3 than Omega 6 and

are highly beneficial.

Another benefit is there are no known allergies to chia seeds and the seeds can be stored for long periods of time without becoming rancid.

Chia seeds are quite palatable and easily added to an animal's food. The seeds can be ground, eaten raw, or added to water, which will cause the seeds to produce a thick mucilage, known as chia seed gel.

Chia's water absorbing and gelatinous properties make it an effective product for

clearing sand from a horses gut more effectively than psyllium or flax. It can help to clear impurities from the digestive system gently and effectively and can help to prevent ulcers when fed regularly.

Dosage:

Horses: 1/3 cup (40g) daily  
Dogs: 1 or 2 tablespoons daily  
Cats: 2 teaspoons daily

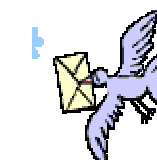

Available in 1kg, 2kg and 5kg packs.

Greenpet Chia seeds are a high quality human-grade supplement.

### WHY YOU SHOULD DETOX YOUR PET!

**STUDY FOUND 167 HAZARDOUS COMPOUNDS IN THE BLOOD AND URINE OF AMERICAN ADULTS (WITH AN AVERAGE OF 91 PER PERSON TESTED) INCLUDING 76 KNOWN TO CAUSE CANCER**

The average animal is exposed to a high toxin load through water and air pollution, household cleaning supplies, pesticides, disinfectants and food additives. According to the EPA, 70,000 chemicals are used commercially in the U.S.A., 65,000 of which are potentially hazardous to our health. (Australian results would be similar.)

PCB's, dioxins, phthalates, DDT and furans are just some of the chemicals that are commonly found in human tissue and blood. A 2003 study on humans by Mt. Sinai School of Medicine and the Environmental Working Group, identified a total of 167 hazardous compounds in the blood and urine of American adults (with an average of 91 per person tested), including 76 known to cause cancer, 94 that are toxic to the nervous system, 82 that damage the lungs, 86 that affect hormone function and 79 that cause birth defects.

Included among these compounds were highly toxic heavy metals such as Lead, Aluminium, Mercury and numerous herbicides and pesticides. A similar study the following year by the Environmental Working Group found 287 industrial chemicals in babies' umbilical-cord blood - with an average of 200 chemicals in each newborn tested - including 180 known to cause cancer and 217 that are toxic to the brain and nervous system. These tests are part of a field of scientific study known as body burden analysis.

Zeo Pet & Vet is a 'chelating' or cleansing formulation containing pure Australian Clinoptilolite. A natural volcanic ash which is essentially a negatively charged honeycomb like 'cage' structure capable of attracting and electro-chemically bonding with toxic compounds and metals such as Mercury, Lead, Copper, Aluminium,

Cadmium, Nickel and Arsenic for safe, natural removal from the body.

When taking Zeo Pet & Vet, your animal's pH levels should balance throughout the body which will then allow the natural immune system to work more efficiently. Given that all animals have had relatively different exposures to various levels of toxins from food and the environment, there is a wide range of feedback from pet owners using Zeolite for various reasons ranging from specific ailments to general beneficial health and well-being concerns.

For most animals there are no side effects. This is a safe chelation product. If your pet experiences discomfort, it is likely due to dehydration. Have the animal drink more water and any symptoms of discomfort should pass.

### NEW HOOF GEL AND PADS

#### DECRON HOOF GEL & PADS

A fast and effective aid for hoof problems including:

- \* Abscess
- \* Sole bruises
- \* Corns
- \* Nail punctures
- \* Thrush.

Save time... No need to add water. The Decron Gel does not soften or water log the

hoof.

Save money... For best results apply each application for a 24 hour period.

That is double the time of the typical 12 hour poultice.

Decron Gel is a powerful osmotic drawing agent made from glycerine, lavender oil, melaleuca oil and arnica.

The pack includes 1 x Decron

Gel sachet and 1 x felt pad.

Note: At least two applications are recommended and best results are achieved with correct bandaging and no exposure to water.

**Only \$14.95 per pack !**

#### NATURAL TREATMENT FOR EQUINE HOOF PROBLEMS ~

- \***ABSCESS**
- \***SOLE BRUISES**
- \***CORNS**
- \***NAIL PUNCTURES**
- \***THRUSH**

### FEEDBACK FROM OUR CUSTOMERS

#### DR GOODPET HOT PANTS

"I am extremely impressed with these pants. How often does one buy something only to be disappointed that they don't live up to expectation...so much so am compelled to write this review. They are exactly as advertised - no false claims, and very professionally made. Although I have to say though as yet we have not had any 'accidents' since."

#### HEAL-ALL CREAM

"I've been using this on my Shar Pei. He gets rashes on his belly and in his armpits and this clears them up within 24 hours with only 2 applications. It's very economical too. Thanks Greenpet. Saves me resorting to cortisone."

#### VET'S ALL NATURAL COMPLETE MIX

"A friend of mine has an 8 year old Aussie terrier that has had numerous surgeries on his hind leg and a front paw over the last 3 years and last year was diagnosed with Diabetes. She has been using the Vet's All Natural food for about a month now and recently the terrier was required to have blood tests at her conventional vet and 'lo and behold' he returned a negative blood sugar reading. The vet kept the dog all day and continued with the tests as she doubted each result. When my friend picked her dog up the vet stated "whatever you're doing keep it up" which my friend never thought she'd hear from this vet .... All due to

Vet's All Natural. I am now trying it out on my Cavoodle and my sister's Maltese Terrier who is quite fussy. It's been one day so far and they gulp the whole feed down."

#### GREENPET ESSENTIALS

I've been giving my dog the Greenpet Essentials since he started on solid food when he was a puppy. I feed him raw beef mince with raw vegetables and I add some Greenpet Essentials on his mince. He absolutely loves it. He's 3 years old now and is a happy and healthy dog.

#### K9 NATURAL TREATS

"My four dogs just love it! I can give it to my smallest Chihuahua who does not chew food - just woofs it

down and I know she won't choke on this treat."

#### VEGIE-PLUS

"I have been using Vegie-Plus for many months now to feed both my dogs and cats. I mix it with fresh pet mince and find even my fussiest will gulp it down. Their coats are shiny and soft and energy levels fantastic. Thanks Greenpet for a great product."

#### ZIWIPEAK CAT FOOD

I got a bag of this to try for those times when I haven't defrosted a bag of raw food in time. My cats generally won't eat any processed foods but they loved this. I'm placing a second order now so that I always have a bag or two on hand for meals and the occasional treat.

### WINTER ACHES & PAINS

As the cooler weather starts, this is often a time when we notice our older animals becoming stiff and sore. This is where natural supplements can make a huge difference to your animal's comfort level.

We have a range of joint supplements that are totally safe, have no side effects and offer natural pain relief for all kinds of joint problems. Vet's All Natural Joint

Formula can be given to dogs, horses and cats.

Technyflex is available in canine, feline and equine formulas.

Greenpet Joint GMC is ideal for dogs and horses.

Glucosamine, shark cartilage and MSM powders are available on their own to suit all budgets and can have your animal more mobile in no time.

### PRICE REDUCTION!

The range of Provide-It equine supplements have undergone some changes recently. The Alleviate Xtra-Cal has been improved to give even greater results and, best of all, the price has reduced for both Alleviate and Alleviate Xtra-Cal.

The Horse Vitamin and Mineral Mix has also been re-formulated to provide even better nutrition for your horse. These supplements

contain organic ingredients of the highest quality and results speak for themselves. Not all equine supplements are equal and if you want to ensure your horse is getting the full range of nutrients for optimum health, then you can't go past these. Try them to see the difference in your horses' overall health and temperament.
