FOOD FOR DOGS

AUSTRALIAN
MADE AND OWNED

CRAFTED BY PHARMACISTS IN OUR OWN SYDNEY
KITCHENS WITH AUSTRALIAN INGREDIENTS

Our story

Vetalogica is a family-owned, Australian company created by two pharmacist brothers who needed a soothing pet food blend for their dog Murphy, who suffered from skin issues. After years of research, we successfully developed a scientific formulation with natural ingredients.

Over a decade later, Vetalogica has become an award-winning, worldwide leader in biologically appropriate dog nutrition. Vetalogica is fully committed to sourcing Australian regional ingredients and carefully crafting biologically appropriate dog foods in our own Sydney, Australian kitchens.

Vetalogica is proudly Australian Made and Owned and remains a 100% independent, family company.

Scott Shahidi B.Pharm. M.P.S

Raymond Shahidi and Scott Shahidi
(Founders/Pharmacists/Brothers)

Never outsourced

**CRAFTED IN OUR OWN SYDNEY
KITCHENS BY PHARMACISTS**

Unfortunately, many dog food brands are simply marketing companies that outsource the production of food to outside companies.

Vetalogica Biologically Appropriate Dog Foods are carefully crafted in our own Sydney, Australian kitchens under strict Australian Standards. Every step of the crafting process is handled in our own kitchens and never outsourced to ensure the highest quality standards are met.

Our delicately cooked small batch recipes are crafted daily for freshness using only the finest regional ingredients and contain NO grain, glutes, corn, wheat, soy, artificial colours, artificial flavours, artificial preservatives or GMOs.

Tahir – committed to crafting quality dog foods in our Sydney Kitchens

APPROVED MEMBER

Vetalogica mirrors the quality and high protein diets pets are evolved to eat.

AUSTRALIAN INGREDIENTS

We support and trust Australian farmers to supply quality regional ingredients.

We care about Australian farmers

At Vetalogica, we believe supporting local Australian farmers is just as important as crafting quality dog foods. Being Australian made and owned and a family company ourselves, we proudly feature regional ingredients from Australia's fertile farms.

Whether it's our tender pork from regional SA, our pasture-raised lamb from VIC or our delicious mackerel fished from the pristine-waters of NSW, Vetalogica is dedicated to sourcing quality Australian ingredients and including these in our biologically appropriate dog foods.

AUSTRALIA'S FERTILE FARMS PROVIDE SOME OF THE FINEST INGREDIENTS IN THE WORLD

Our Meat Journey™

We source our Australian meats from ethical farmers who share our core value that all animals should be raised with kindness and respect. This results in happier and healthier farm animals, as well as high-quality meat inclusions in our natural, biologically appropriate dog foods. Sourcing local nutrient-rich Australian meats also helps support local farmers and benefits the environment.

BIOLOGICALLY APPROPRIATE DOG FOODS

BIOLOGICALLY
APPROPRIATE FOOD
HIGH PROTEIN LOW CARBS

NATURAL DOG FOOD
+ VITAMINS & MINERALS

Our Australian biologically appropriate dog foods mirror the high-protein diet, quality and variety of meats dogs are evolved to eat offering complete nutrition the way mother-nature intended.

The modern dog evolved from the wolf and the anatomies of modern dogs and their ancestors are almost identical, meaning they need high meat diets. Dogs crave quality meats and that's what we crafted in our biologically appropriate dog foods.

Gray Wolf (*Canis Lupus*), ancestor of the domestic dog
(*Canis Lupus Familiaris*)

Biologically appropriate standards

OUR STANDARDS OF EXCELLENCE WHEN CRAFTING BIOLOGICALLY APPROPRIATE DOG FOODS

- 1. HIGH-PROTEIN DIET**
65% protein-rich meats and animal ingredients and free from potato and pea fibre protein concentrates. Balanced with minimal carbohydrate inclusion of less than 35% including low GI regional fruits, vegetables and superfoods such as sweet potato, lentils and chickpeas.
- 2. AUSTRALIAN MEATS**
We source 100% of our gently prepared, protein-rich Australian meat meals from local Australian suppliers and farmers.
- 3. MEAT VARIETY**
A variety of 4–6 different meat sources in our formulations. The way mother nature intended.
- 4. FULL PREY PORTIONS™**
Balancing quality meats with important animal oils to mirror what dogs would hunt for in the wild.
- 5. NATURAL INGREDIENTS**
Nature offers the nutritional requirements modern dogs need. Our formulations mirror this natural philosophy and contain essential vitamins and minerals with no grain, potato, tapioca, artificial colours, flavours, preservatives, glutens, soy or GMOs.

1. High-protein diet

PURE AUSTRALIAN MEAT MEALS

Gently prepared, protein-rich Australian Meat Meals sourced from local Australian farmers and suppliers. Our meat meals are carefully prepared from quality Australian meats to create a source of richly nourishing protein that cannot be supplied from fresh meat alone.

Our natural biologically appropriate dog foods are free from potato, tapioca and pea fibre protein concentrates.

Balanced with minimal carbohydrate inclusion of less than 35% and free from cheap fillers such as grain, corn, wheat or rice. Our low GI regional fruits, vegetables and superfoods include sweet potato, lentils and chickpeas.

38-40%

PROTEIN

LOW-TEMPERATURE PREPARATION

Our Australian Meat Meals are gently simmered at low temperatures to ensure all the nutrients are 'locked-in', offering a highly nutritious biologically appropriate dog food.

2. Australian meats

AUSTRALIAN MEATS FROM LOCAL FARMERS

100% of our gently-prepared meat and animal ingredients are from local Australian farmers and suppliers.

We work tirelessly in partnership with Australian farmers who share our vision for quality ingredients and high-protein meats. We trust our Australian suppliers to provide the very best ingredients and we are proud to support and work alongside our local Australian farming community every day.

Our Australian Meat Meals are nutrient-dense and a rich source of protein.

Regional NSW, source
of high-quality chicken
and duck meat

3. Meat variety

In nature, there is a large variety of meats which dogs are anatomically built to eat. Our biologically appropriate dog foods mirror this variety and include between 4–6 different meat and animal ingredients.

Each meat source has its own unique nutritional profile and when combined together, a synergistic and nutritionally complete biologically appropriate dog food results.

For instance, kangaroo, which is a high protein based meat is complimented nicely with a fattier meat such as lamb. A variety of quality, Australian meats is a very important dietary foundation for complete and balanced, biologically appropriate dog foods.

VETALOGICA BIOLOGICALLY APPROPRIATE RIVERLAND RED ADULT DOG FOOD

4. Full Prey Portions™

In the wild, dogs would hunt for Full Prey™ since each portion of the prey has a nutritional role and requirement. Vetalogica's biologically appropriate dog foods mirror this natural diet.

We blend together protein-rich Australian meats with healthy animal oils necessary for nourishing diets in modern dogs.

Our Full Prey™ foods provide the majority of nutrients needed however, we also minimally supplement our foods with essential vitamins and minerals which modern dogs need for complete and balanced diets according to the AAFCO Guidelines.

5. Natural ingredients

Our biologically appropriate dog foods contain no grain, potato, artificial colours, flavours, preservatives, glutes, soy or GMOs. We just use natural ingredients with added vitamins and minerals for complete and balanced dog food.

Vetologica Biologically Appropriate Dog Foods feature low-glycaemic, regional fruits, vegetables and superfoods including sweet potato, lentils and chickpeas. Vetologica crafts small batch dog foods under the watchful eye of registered Australian pharmacists in our own Sydney kitchens.
