Eczema/Hair Loss
Arthritis

Parent's Name: Mary

Test Version: Greenpet

Test Date: 19/4/2011

Other:

Dear Mary

Congratulations on taking the first step towards a healthier, happier Pet!

Over the next six months we'll be working together to rid your pet's body of irritants that cause suffering and pain, and providing it with what it needs for greater well-being.

What's more, aside from a little commitment, it's easy! All you have to do is follow a few simple guidelines set out in this report.

Here are a few important things to remember before we get started:

1. This programme is NOT based on Veterinary Allergy Testing. It is a Wellness Programme, based on the results of Bio-Compatibility testing.
2. These test results are specific for your pet.
3. It is very important to follow through with the 4 week Progress Report as we find that often, at that stage, the programme needs some adjustments for best results.
4. Items in RED have tested badly for your pet's immune system and must be avoided.
5. Foods known to have caused bad reactions in the past should not be re-introduced. In other words, continue to avoid foods that you are avoiding already (even if they are NOT in red).
6. Fill out the 4 week Progress Report and return to your consultant.

FOUR WEEK PROGRESS REPORT

This report allows you to monitor your progress while you are following the Bio-Compatibility Programme.

As time goes by it becomes increasingly difficult to recall exactly how you were feeling, but filling in this table will give you a tangible way to plot your recovery. This will keep you motivated to stick with the programme and help you see how your body is responding to the programme. You will also be able to tell with greater certainty whether your symptoms are easing.

It only takes a few minutes at most each week, and you'll be amazed at the results.

Simply follow this quick two-step process:

Step 1 – Mark the percentage by which you feel each symptom has improved (relative to the commencing the programme). Please bear in mind that some symptoms might get worse before they get better. If this happens, don't be discouraged — make a note of it and talk to your Wellness Consultant about any concerns you may have.

Step 2 – Return completed form to your Wellness Consultant to discuss these results at your next appointment.
