Hair Tissue Mineral Analysis

Order Form

A Hair Tissue Mineral Analysis test measures the levels and comparative ratios of nutrient and toxic minerals found in hair. More than 35 nutrient and toxic metals, and 25 important mineral ratios are analysed. Test results include a detailed report on your nutrient and toxin levels and suggestions on how to overcome any nutritional disorders and/or unwanted toxin levels. The cost of the test is \$150.

HAIR SAMPLE LOCATIONS: Hair is best taken from the nape of the neck and back of head region. The sample should be taken as close to the scalp as possible and should be no longer than 2 - 2.5 inches or 5cm. Try to avoid using medicated shampoo or other hair treatments on the hair prior to taking the sample.

AMOUNT OF HAIR NEEDED: You will need approximately 4cm or 1.5 inches of hair (**at least 1 heaped tablespoon**) or not less than 1g, cut as close as possible to the skin, using clean scissors or a razor.

Place the hair sample immediately into a sealable PAPER envelope to avoid any contamination. (Note: Plastic and foil are potential contaminants.)

**Please send the hair sample with payment of \$150 to:
244 Verrierdale Road, Verrierdale Qld 4562**

PH: 07 5449 1453 Calling from outside of Australia: +61 7 5449 1453
